PICKETT'S OHIO GROWN FRUIT TREES

For about one hundred years we have given special attention to Fruit Trees, growing them with utmost care and skill in our own large Nurseries. Pickett's trees are good trees and are sold at reasonable prices. We propagate our Fruits under careful conditions, selecting buds from bearing trees of outstanding merits. This is your assurance that our trees are pure and of the best strains.

Well cared for in the Nursery, the trees are thrifty and well-rooted. We dig them carefully, running the digger very deep so that you get all the feeding and fibrous roots and you know the trees can grow.

The farmer and gardener who has bearing Fruit Trees makes money. Plant some trees this year and every year.

The laws of nature make trees bear better in groups, so plant more than one variety of each fruit so they may cross pollinate.

Number of Trees or Plants for an Acre of Ground Set at Regular Distance Apart

1 by 1	43560	5 by 5 ...	1742
2 by 1 ..	21780	6 by 6	1210
2 by 2	10890	8 by 8 ..	680
3 to 1	14520	10 by 10	435
3 by 3	4840	16 by 16 ..	170
4 by 1	10890	20 by 20	109
4 by 2	5445	25 by 25 ...	70

5 by 3	2904	40 by 40	27
5 by 4	2178	50 by 50	17

Rule: Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43560) will give the number of trees to an acre.

TREES

The size of all trees is given by height or caliper. The caliper of a tree is the diameter of the trunk 6 in. above the ground line. Our Shade and Flowering trees are planted in seven foot rows, thus giving ample room for proper development of root, trunk and top. Also, they are root pruned for better root development. Trees grown in this manner are sure to please you.

OUR LANDSCAPE SERVICE

If you need help with your landscaping bring a rough sketch and dimensions to the Nursery with you and let our competent salesmen make suggestions. We are always glad, too, to send our representative to look over your property and prepare complete plans. Avail yourself of this service.

HEDGE PLANTS

Our well rooted bushy plants quickly make a splendid fence of living green. All varieties make satisfactory hedges, if the plants are set in a straight row 1 ft. apart. If a wider and more dense hedge is desired, set the plants in a double row 8 inches apart each way.

BARBERRY T. ATROPURPUREA
